

RAFFI MULOC

SOFTWARE ENGINEER

Zamboanga City, Philippines | +639569303690 | raffibucog@gmail.com

PROFESSIONAL SUMMARY

Experienced Full Stack Software Engineer with 8 years of expertise in designing, developing, and maintaining scalable web applications using modern JavaScript/TypeScript technologies. Skilled in React, Next.js, Node.js, and backend system architecture, with hands-on experience in performance optimization, API integrations, and high-traffic platforms. Passionate about delivering clean, maintainable, and efficient solutions while collaborating closely with teams to solve complex business and technical challenges.

SKILLS

- **Frontend:** React, Next.js, TypeScript, Redux, Zustand, Vue, Pinia, TanStack, Tailwind
- **Backend:** Node.js, NestJS, Express, KoaJS, GraphQL, PHP, Laravel, Django, FastAPI
- **Databases:** MySQL, PostgreSQL, MariaDB, Railway, MongoDB, Supabase, Firebase
- **Testing:** Jest, React Testing Library, Unit Testing, Cypress, Playwright
- **Cloud & DevOps:** AWS, GCP, Docker, CI/CD, API Gateway, Linode, Auth0
- **AI-Assisted Engineering:** GitHub Copilot, OpenAI, Claude, Cursor, v0 (AI-driven prototyping & code acceleration)

WORK EXPERIENCES

Senior Software Engineer

February 2025 – Present

Grow INC

Member & Insurance Team

- Developed and maintained Admin Dashboard insurance features, improving overall system usability and reliability.
- Implemented conditional insurance properties to adjust coverage logic based on business rules dynamically.
- Built and enforced robust form validations to ensure data accuracy and reduce submission errors.
- Implemented insurance metrics calculations to support reporting and operational insights.
- Developed insurance platform announcement features for timely communication with users.
- Performed UI text improvements and fixes to enhance clarity and user experience.
- Maintained consistent page behavior and UI stability through ongoing fixes and enhancements.

Member Adviser Team

- Developed and maintained insurance platforms for multiple insurance providers, supporting diverse product requirements.
- Implemented product subtypes into the registration flow, allowing users to create an account based on their product.

- Built and enhanced user registration and onboarding flows.
- Implemented secure authentication and login flows using Auth0.
- Developed automated data synchronization between Admin Dashboard systems and insurance platforms to ensure data consistency.
- Led a Node.js codebase version upgrade, improving performance, security, and long-term maintainability.

Primary Technology Utilized

Java; VueJS; Styled Components; TailwindCSS; KoaJS; Auth0; AWS

Senior Full Stack Developer

April 2023 – February 2025

Bounty Media

- Develop and maintain a consumer voucher redemption platform.
 - Implemented a consumer dashboard that enables users to easily add or remove their data from the platform, enhancing user control and data management capabilities.
 - Implemented a consumer verification feature that allows users to verify which offers are associated with their mobile number.
 - The platform handled a peak of 60,000 simultaneous users seamlessly, with no performance issues, demonstrating its robust scalability and stability under high traffic.
 - Integrated Google Analytics via Google Tag Manager.
- Develop and maintain a campaign management system with a dynamic page designing feature for admin users and advertisers.
 - Implemented a comprehensive redesign of the login interface, campaign form builder, offers page, and company page.
 - Optimized the fetching latency of the connections filter, significantly reducing load times.
 - Implemented bulk import of voucher codes.
 - Implemented Analytics Dashboard from scratch.
 - Integrated a webhook API through the API gateway.

Primary Technology Utilized

ReactJS; TypeScript; Bootstrap; NextJS; NestJS; Redis; Mysql; AWS

Senior Full Stack Developer

August 2022 – March 2023

Orchid

- Transformed a material management process from a manual Excel-based workflow into a scalable web application, improving operational efficiency and data accessibility.
- Designed and implemented the main dashboard, providing users with centralized insights and streamlined navigation.
- Developed a finished product recommendation feature to improve product discovery and support decision-making.
- Built the items view page with optimized data presentation and user-friendly interaction.
- Implemented a gallery web application that enables users to upload, manage, and sell artworks online.
- Developed responsive dashboard interfaces optimized for both web and mobile experiences.
- Created an artwork management interface that allows users to efficiently upload, organize, and edit artwork details.
- Optimized application performance by implementing list-based data fetching and efficient data handling strategies.
-

Primary Technology Utilized

ReactJS; NextJS; TypeScript; MaterialUI; NodeJS; ExpressJS; and MongoDB

Lead Software Developer

January 2021 – August 2022

EXCO IT Services

- Mentoring junior team members and ensuring they adhere to determining software quality standards.
- Designed and implemented an application for hotel, events, and restaurant managing companies used by the employees.
- Maintained a real estate management application for a real estate investments and consulting company managing company properties for office and commercial use.
- Directing the development team in the design, development, coding, testing, and debugging of applications.
- Analyzed existing systems and workflows to identify inefficiencies and implemented improvements that enhanced usability, performance, and operational efficiency
- Conducted ongoing product evaluation and iterative improvements based on user feedback and system performance insights
- Mentored junior developers while promoting best practices in both product thinking and software quality standards.

Primary Technology Utilized

ReactJS; Ant Design; NodeJS; PHP; ExpressJS; MySQL; Linode

Senior Software Engineer

September 2019 – January 2021

EXCO IT Services

- Designed and implemented a real estate management application for a real estate investments and consulting company managing company properties for office and commercial use.
 - Developed the metric calculations for properties
 - Introduced pointing metric system
 - Developed main forms for property description
 - Help deploy the system to production
 - Integrated import functions with CSV file
 - Introduced MobX for state management
- Maintained a budget estimation and management application for offices in a dental company.
- Maintained a patient billing system for a hospital used by administrative staff for patient billing and insurance.
- Designed and implemented a social media activity tracking application that provides a dashboard page for data visualization used by a watch manufacturer company.
- Designed and implemented a contract management application for company internal use
- Mentoring junior team members and ensuring they adhere to determining software quality standards

Primary Technology Utilized

ReactJS; VueJS; Ant Design; NodeJS; ExpressJS; PHP; MySQL; Linode

Software Developer

May 2017 – August 2019

EXCO IT SERVICES

- Designed and implemented a budget estimation and management application for offices in a dental company.
 - Developed the whole system from scratch to deployment
 - Developed all main features such as budget forms, reporting, import of previous year's data, user management dashboard, etc.

- Introduced developing this project with ReactJS
- Developed backend APIs and database design
- Designed and implemented a project management application for company internal use.
- Developed company landing pages
- Testing and evaluating new and existing applications

Primary Technology Utilized

ReactJS; VueJS; Ant Design; NodeJS; ExpressJS; PHP; Wordpress; MySQL; Linode

Senior Frontend Engineer

Achieve Without Borders

Octoberber 2021 – March 2021

Part-time

- Developed a consumer management system for a billing platform used by tellers.
 - Developed the consumer details page
 - Developer the main dashboard listing consumers and billing details
 - Developed invoice generation feature

Primary Technology Utilized

ReactJS; Material UI; NodeJS; ExpressJS; PostgreSQL; AWS

ACHIEVEMENTS

- Promoted to the position of Head of Web Development/Lead Software Developer
- Passed the License for Programmers/Electronic Data Processing Specialists issued by the Department of Information and Communications Technology
- Served as a guest speaker at Dev Fest ZamPen 2019, organized by Google Developer Group Zamboanga, sharing insights and knowledge on Frontend Development with ReactJS, and engaging with the developer community.
- Received the Employee of the year award in 2020
- Received the Employee of the year award in 2018

EDUCATION

Master in Information and Technology

2019 – Present

Western Mindanao State University

Bachelor of Science in Computer Engineering

2010 – 2016

Western Mindanao State University

CERTIFICATE OF ELIGIBILITY

Electronic Data Processing Specialist

November 24, 2018

Department of Information and Communications Technology Mindanao Cluster 1

Civil Service Eligibility

March 18, 2018

Civil Service Commission
