

RAFFI MULOC

SOFTWARE ENGINEER

Zamboanga City, Philippines

+639569303690

raffibucog@gmail.com

PROFESSIONAL SUMMARY

Experienced Full Stack Software Engineer with 8 years of expertise in designing, developing, and maintaining scalable web applications using modern JavaScript/TypeScript technologies. Skilled in React, Next.js, Node.js, and backend system architecture, with hands-on experience in performance optimization, API integrations, and high-traffic platforms. Passionate about delivering clean, maintainable, and efficient solutions while collaborating closely with teams to solve complex business and technical challenges.

SKILLS

- **Frontend:** React, Next.js, TypeScript, Redux, Zustand, Vue, Pinia, TanStack, Tailwind
- **Backend:** Node.js, NestJS, Express, KoaJS, GraphQL, PHP, Laravel, Django, FastAPI
- **Databases:** MySQL, PostgreSQL, MariaDB, Railway, MongoDB, Supabase, Firebase
- **Testing:** Jest, React Testing Library, Unit Testing, Cypress, Playwright
- **Cloud & DevOps:** AWS, GCP, Docker, API Gateway, Linode, CI/CD
- **AI-Assisted Engineering:** GitHub Copilot, OpenAI, Claude, Cursor, v0, Ollama (local LLM deployment, agent workflows, self-hosted LLM inference)

WORK EXPERIENCES

Senior Software Engineer | Grow Inc.

February 2025 – Present

- Developed and maintained Admin Dashboard insurance features, improving overall system usability and reliability.
- Implemented conditional insurance properties to adjust coverage logic based on business rules dynamically.
- Built and enforced robust form validations to ensure data accuracy and reduce submission errors.
- Implemented insurance metrics calculations to support reporting and operational insights.
- Developed insurance platform announcement features for timely communication with users.
- Performed UI text improvements and fixes to enhance clarity and user experience.
- Maintained consistent page behavior and UI stability through ongoing fixes and enhancements.
- Developed and maintained insurance platforms for multiple insurance providers, supporting diverse product requirements.
- Implemented product subtypes into the registration flow, allowing users to create an account based on their product.
- Built and enhanced user registration and onboarding flows.
- Implemented secure authentication and login flows using Auth0.

- Developed automated data synchronization between Admin Dashboard systems and insurance platforms to ensure data consistency.
- Led a Node.js codebase version upgrade, improving performance, security, and long-term maintainability.

Primary Technology: VueJS, Styled Components, TailwindCSS, KoaJS, Auth0, AWS

Senior Full Stack Developer | Bounty Media

April 2023 – February 2025

- Developed and maintained a consumer voucher redemption platform that seamlessly handled a peak of 60,000 simultaneous users with zero performance degradation.
- Implemented a consumer dashboard enabling users to self-manage data removal from the platform, enhancing data privacy and control.
- Implemented a consumer verification feature for users to confirm offers associated with their mobile number.
- Integrated Google Analytics via Google Tag Manager for tracking and analysis.
- Developed and maintained a campaign management system featuring a dynamic page builder for admin users and advertisers.
- Executed a comprehensive UI redesign of the login interface, campaign form builder, offers page, and company page.
- Optimized fetching latency of the connections filter, significantly reducing data load times.
- Implemented bulk import functionality for voucher codes and built a custom Analytics Dashboard from scratch.
- Integrated a webhook API through the API gateway to support external system communications.

Primary Technology: ReactJS, TypeScript, Bootstrap, NextJS, NestJS, Redis, MySQL, AWS

Senior Full Stack Developer | Orchid

August 2022 – March 2023

- Transformed a legacy, manual Excel-based material management workflow into a scalable web application, drastically boosting operational efficiency.
- Designed and implemented the main analytics dashboard, providing centralized business insights and streamlined navigation.
- Developed an algorithmic finished product recommendation feature to improve product discovery and decision-making.
- Built an optimized items view page featuring clean data presentation and user-friendly interactions.
- Implemented a gallery web application that enables users to upload, manage, and sell artworks online.
- Developed responsive dashboard interfaces fully optimized for both desktop and mobile web experiences.
- Created a secure artwork management interface allowing users to upload, organize, and edit artwork metadata.
- Optimized overall application performance by deploying list-based data fetching and efficient state-handling strategies.

Primary Technology: ReactJS, NextJS, TypeScript, MaterialUI, NodeJS, ExpressJS, MongoDB

Lead Software Developer | EXCO IT Services

January 2021 – August 2022

- Directed the engineering team through the full SDLC, leading the design, development, coding, testing, and debugging of critical enterprise applications.
- Mentored junior developers, promoting best practices in product thinking, clean code architectures, and software quality standards.

- Designed and implemented a management application tailored for hotel, events, and restaurant management enterprises.
- Maintained and enhanced a property management platform utilized by real estate investments and consulting firms to manage commercial office spaces.
- Analyzed legacy systems and workflows to isolate inefficiencies, successfully deploying targeted usability and performance optimizations.
- Conducted ongoing product evaluations and engineered iterative improvements utilizing real-world user feedback.

Primary Technology: ReactJS, Ant Design, NodeJS, PHP, ExpressJS, MySQL, Linode

Senior Software Engineer | EXCO IT Services

September 2019 – January 2021

- Engineered a commercial real estate management application, writing core metric calculation modules and introducing a custom pointing metric system.
- Developed main dynamic forms for property description layouts and successfully drove production deployment phases.
- Integrated high-speed CSV parsing engines to support bulk data import functions.
- Introduced MobX for global state management, drastically improving data-flow predictability across frontend components.
- Maintained an office-wide budget estimation and operational management application for a dental provider network.
- Maintained a legacy patient billing and insurance claim verification system used by administrative hospital staff.
- Built a social media activity tracking application featuring real-time data visualization dashboards for a global watch manufacturer.
- Designed and implemented a secure internal contract management application for corporate tracking.

Primary Technology: ReactJS, VueJS, Ant Design, NodeJS, ExpressJS, PHP, MySQL, Linode

Software Developer

May 2017 – August 2019

EXCO IT SERVICES

- Designed and executed the end-to-end development (from scratch to production deployment) of a dental office budget estimation system.
- Authored core system features, including data-heavy budget forms, reporting generation engines, previous-year data importers, and user management modules.
- Maintained backend REST APIs and executed underlying database architectural designs.
- Successfully advocated for and pioneered the internal transition to ReactJS for web architectures.
- Designed, built, and launched internal project management tools and corporate marketing landing pages.

Primary Technology: ReactJS, VueJS, Ant Design, NodeJS, ExpressJS, PHP, WordPress, MySQL, Linode

Senior Frontend Engineer (Part-Time Contract) | Achieve Without Borders

October 2021 – March 2022

- Developed a customer management system for an enterprise billing platform used extensively by financial tellers.
- Designed and developed consumer details pages alongside a core dashboard displaying active users and billing ledgers.
- Engineered an on-demand automated invoice generation feature.

Primary Technology: ReactJS, Material UI, NodeJS, ExpressJS, PostgreSQL, AWS

ACHIEVEMENTS

- Promoted to Head of Web Development / Lead Software Developer at EXCO IT Services.
 - Passed the professional Programmer / Electronic Data Processing Specialist license issued by the Department of Information and Communications Technology (DICT).
 - Invited Guest Speaker at Dev Fest ZamPen 2019 (Google Developer Group Zamboanga), presenting on "Frontend Development with ReactJS".
 - Awarded Employee of the Year (2020) at EXCO IT Services.
 - Awarded Employee of the Year (2018) at EXCO IT Services.
-

EDUCATION

Master in Information Technology (2019 – Present)

Western Mindanao State University

Bachelor of Science in Computer Engineering (2010 – 2016)

Western Mindanao State University

CERTIFICATE OF ELIGIBILITY

- **Electronic Data Processing Specialist** | Department of Information and Communications Technology (DICT) Mindanao Cluster 1 (Issued: November 24, 2018)
- **Civil Service Eligibility** | Civil Service Commission (Issued: March 18, 2018)
